Authorization for this examiner's amendment was given in a telephone interview with Kimton N. Eng on May 14, 2007.

In the claims:

Claim 16, line 12 after "sub-order", insert --, at least one of the set of M member sub-orders, the set of P precedence criteria and the set of Q specific fields are modifiable--.

Claim 6: Canceled

Allowable Subject Matter

2. Claims 1, 3-4, 8-16, 18, and 55 are allowed.

Reasons for Allowance

3. The following is an Examiner's statement of reasons for allowance:

The closest prior art is to Faaland (U.S. Patent No. 5524077). Faaland teaches a task execution support system for supporting the execution of a task composed of a plurality of works executed by a plurality of workers comprises memory means for memorizing tasks with contents of respective works of respective workers associated with each other and task information management means for changing a work of related other worker in response to the input of changed contents and memorized contents of the memory when the contents of a work are changed. However, fails to teach relating the plurality of member suborders by a set of P precedence criteria, where $P > 0$, the precedence criteria identifying a predecessor sub-order to be started or completed prior to starting the member sub-order as recited in independent claim as recited in independent claims 1 and 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
